Kotlin | Swift | Kotlin Multiplatform | Jetpack Compose | SwiftUI | C# | .NET | TypeScript | React | Cloudflare Workers | Clean Architecture

PROFESSIONAL PROFILE

Senior Full Stack & Mobile Developer at Solusoft (Madrid), promoted from Junior after 15 months and now the technical reference for 2–3 production apps and 2 internal APIs. I build native mobile apps — Android (Kotlin, Jetpack Compose) and iOS (Swift, SwiftUI), plus Kotlin Multiplatform in my own products — on top of .NET REST APIs, and TypeScript APIs on Cloudflare Workers. Shipped EPDM on Google Play (1,000+ installs), Iberext on 100+ field devices and the Transportes Chinchón Android and iOS apps.

Portfolio and case studies: sebas1705carreer.github.io/carreerV2

PROFESSIONAL EXPERIENCE

Senior Full Stack & Mobile Developer — January 2026 - Present · Hybrid

Solusoft

Technical lead for mobile and full-stack delivery: architecture, native Android/iOS and the .NET APIs behind them.

- Promoted to Senior within the same team after 15 months; now the technical reference for 2–3 production apps and 2 internal APIs
- Led the Transportes Chinchón programme: native Android and iOS apps delivered in feature parity over a shared .NET backend (ApiMovil), my first production iOS release
- Designed and maintain ApiMovil and the Wemob .NET REST APIs, the single backend shared by web and both native mobile clients
- Drove the migration of AGEDI, Sisley, Iberext and EPDM towards clean multimodular architecture, enabling a bi-weekly release cadence
- Established architecture reviews and delivery planning for the mobile team

Products: AGEDI, Sisley, Iberext, EPDM, ApiMovil, Wemob, Transportes Chinchón

Junior Full Stack & Mobile Developer — March 2025 - December 2025 · Hybrid

Solusoft

Shipped two Android apps from zero to production (EPDM on Google Play, Iberext in the field) while maintaining the .NET platforms.

- Built and published the EPDM Music Portal Android app end to end (Kotlin, Jetpack Compose, Firebase) on Google Play, with 1,000+ installs
- Delivered Iberext to production: migrated a legacy Windows tablet app to native Android on a multimodular clean architecture, deployed on 100+ field devices
- Shipped dozens of features and fixes across AGEDI and Sisley (C#/.NET, SQL Server, Azure) alongside the mobile work
- Introduced clean, multimodular Android architecture to the team as the baseline for new mobile projects

Products: AGEDI, Sisley, Iberext, EPDM

Full Stack & Mobile Developer Intern — October 2024 - February 2025 · Hybrid

Solusoft

First enterprise role: features and maintenance on .NET platforms and the technical groundwork of the Iberext Android app.

- Implemented 10+ new features across the AGEDI projects (C#/.NET, SQL Server) within the first months
- Maintained the Sisley frontend and backend, resolving production issues under supervision
- Laid the groundwork of the Iberext Android app (project setup, architecture proposal, first screens), which became the base of the production release
- Offered a junior contract at the end of the internship

Products: AGEDI, Sisley, Iberext

TECHNICAL SKILLS

Languages: Kotlin, Swift, TypeScript, C#, Go, Java, JavaScript, Python, HTML, CSS, Bash, PowerShell

Frameworks & Platforms: Jetpack Compose, Android, Kotlin Multiplatform, Compose Multiplatform, SwiftUI, .NET / ASP.NET Core, React, Ktor, Node.js, Hilt, Spring Boot, Kotlin Coroutines, kotlinx.serialization, Retrofit, Koin, Vitest, Tailwind CSS, Vite, Wails, Material 3

Cloud & Databases: Cloudflare Workers, Firebase, SQL Server, PostgreSQL, Azure, SQLite, Room, SQL

Tools, CI & Testing: Git, GitHub Actions, Gradle, Docker, GitHub, CI/CD, Detekt, JUnit, CodeQL, Doppler, OpenAPI

Architecture & Practices: Clean Architecture, Multi-module Architecture, MVVM, MVI, Test-Driven Development, Agile / Scrum, REST APIs, MVC

AI: AI-Assisted Development, LLM Integration, MCP

KEY PROJECTS

Owlsplit Personal Google Play github.com/Sebas1705/Owlsplit

Offline-first shared-expenses app for Android and iOS (KMP) that settles debts in the fewest payments; live on Google Play.

Haltera Personal Google Play github.com/Sebas1705/Haltera

Free gym logbook for Android and iOS (KMP): 801 exercises, 705 foods, equipment-aware logging and double progression.

Templetry Personal templetry.github.io/wiki github.com/Templetry

Project scaffolding for every platform: deterministic Go engine and CLI, Wails desktop app, MCP server, 29 CI-verified templates.

WinForge Personal github.com/Sebas1705/WinForge

Windows app installer on winget: 870+ publisher-verified apps, 40+ profiles, PC health and repair, and settings backups.

Career Ecosystem (Folio) Personal sebas1705carreer.github.io/carreerV2 github.com/Sebas1705Carreer

Portfolio as a product: a Cloudflare Workers API as single source of truth, the live React portfolio (V2) and Folio, a KMP editor.

EPDM Music Portal Client work · Solusoft Google Play

Native Android app for the AGEDI Music Portal, published on Google Play: protected music content, playback and user rights.

Iberext System Client work · Solusoft

Android app for fire-prevention systems, rebuilt from scratch in Kotlin and Jetpack Compose from a Windows tablet app.

EDUCATION

Master's in AI Development October 2025 - June 2026

BigSchool & Isabel I University

11-module postgraduate: Software Engineering, Architecture, AI, DevSecOps.

Computer Engineering September 2020 - July 2025

Universidad Rey Juan Carlos

Information Technology degree. Móstoles, Madrid. TFG: YouKnow.

Baccalaureate - Technology Sept 2018 - June 2020

IES Maestro Matías Bravo

Valdemoro, Madrid, Spain.
